

M.B.A. Post-Season Tournament Eligibility

Tournament players are to be rostered players and have participated in at least one-half (50%) of their team's games played during the regular season. "Participated" means that player showed up for the game and was available to play. Exception: Players that are injured during the season may not be required to meet the 50% threshold for games played. Any player injured during the season that does not meet the 50% of games required must obtain approval from the league commissioner in order to participate in the post-season tournament. Failure to obtain approval may result in a forfeit of any game that the player participates.
